## APPLICATION PRODUCTS

This range of colours is manufactured using Sennelier artists' quality pigments and superior quality natural gums.

The unctuous consistency of these colours enables the creation of regular backgrounds. These Artists' quality Gouaches have exceptional colouring power and give deep and opaque brush strokes.

These colours are mixable with each other and are highly colourfast (with the exception of a few clearly mentioned tones, necessary for illustration work).

Sennelier Gouaches can be applied with a brush, air-brush or quill, on most types of thick paper and card.

Water-soluble, they can be mixed with watercolours and inks in order to obtain other combinations of opacity or transparency.
